Welcome

White Label Partnership Program

Open Book Extracts' White Label Partnership Program allows you to offer high-quality hemp products while building a loyal customer base under your own label. At Open Book, we have assembled a diverse team of farmers, scientists, and extraction and processing experts to craft the finest quality products while providing world-class customer service.

- We create unique and inimitable products thanks to our high-quality raw materials, our industry-leading extraction and refinement technology, and our team of pharmaceutical-grade chemists.
- Our hemp is grown on independent American farms by farmers with generations of experience. Each year we plant over 400 acres of OBX-sourced genetics in North Carolina, Virginia, and Southern California.
- All of our hemp is processed at our 76,000 square foot state-of-the-art cGMP food-grade facility in Roxboro, North Carolina, the most sophisticated and reliable hemp extraction operation east of the Mississippi River.

OUR CORE PRODUCTS

Our Products

At our extraction campus, every product starts with hand-selected hemp genetics grown exclusively for us on independently owned and operated farms. Every link of our supply chain, from seed selection to product delivery, is safe, transparent and fully compliant. Our custom equipment and extraction processes exceed the highest standards to routinely yield pure CBD ingredients that you and your customers can depend on.

TRACEABLE

Our in-house team of inventory experts tracks our supply chain through the complete life-cycle (cultivation, harvest, extraction, production, testing and packaging) providing unparalleled transparency into the lineage of finished products.

COMPLIANT

All of our products are produced in compliance with applicable state and federal regulations. Open Book's food-grade manufacturing facility and operations comply with the FDA's current good manufacturing practices (cGMP).

SAFE

Open Book's products are tested internally at each step of the refinement process and again at the end by reputable third-party laboratories, ensuring the quality, consistency, and safety of all products leaving our facility.

PRODUCTS

Open Book's white label division features a complete line of proprietary hemp-derived CBD products that can be custom labeled to suit your brand. White labeling offers new customers a speed-to-market advantage, allowing you to start your CBD business quickly with a low minimum initial order quantity.

Our core white label products include --

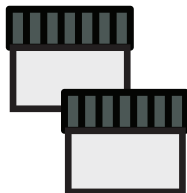

Hemp Extracts (THC-Free & Full Spectrum Tinctures)

- OBX offers premium hemp extracts, including both THC-Free Broad Spectrum extracts and Full Spectrum extracts, in three popular flavors (Peppermint, Lemon Drop, and Natural) and two popular strengths (500mg & 1000mg).
- The 500mg Peppermint and 1000mg Natural are the two most popular extracts.

Hemp Full Spectrum Capsules

- For our foundational full spectrum hemp capsules, OBX uses a lipid infusion process -- a process in which we gently coax all the beneficial compounds out of the hemp flower, maintaining the cellular bonds of the plant and infusing all of the phytonutrient content into the MCT oil, resulting in a nutrient-packed, full spectrum hemp oil.
- Our Full Spectrum Capsules are available in 10mg & 20mg doses.

Hemp Dabs (Distillate and Isolate)

- Hemp Dabs are pure concentrates of CBD, carefully tempered and prepared to be almost wholly CBD and nothing else, making them easily vaporizable, and great for dabbing, cooking, or infusing in products.
- Our Hemp Dabs contain Zero THC, and are available as Distillate (90+% CBD Distillate & natural terpenes) or Isolate (99% CBD Isolate), in four popular flavors (Natural, Lemon Jack, Strawnana, and Forbidden Fruit).
