P5 - Isolates &

Rare Cannabinoids:

- CBD
- CBG
- CBN
- CBC
- THCV
- CBDV
- CBDA

P11 - Distillate &

Specialty Blends:

- THC-Free Broad Spectrum
- 5G
- 10N

P15 - Water Soluble:

- HydroBond™ CBD Water Soluble Liquid Emulsion
- HydroBond™ CBD Water Soluble Powder
- HydroBond™ CBG
- HydroBond™ CBN
- HydroBond™ CBC
- HydroBond™ THCV

P18 - Collections:

- Beauty From Within
- Stay in Focus
- Regenerative Rest

P22 - Finished Goods:

- Ingestibles
 - Tinctures
 - Gummies
 - Fruit Gems
 - Capsules
 - Soft Gels
 - Chocolates
 - Crystallized Powder
- Drink Blends
- Topicals
 - Cooling Body Cream
 - Relief Balm

P38 - Easynaps

P40 - Packaging

P41 - Note from CEO

We're purists at heart

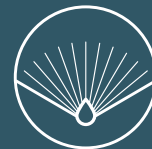

OBX's CBD ingredients are refined from hemp genetics grown for OBX by a network of carefully vetted farmers across North Carolina and Virginia. All extraction and processing is completed at our food-grade cGMP-certified 76,000 square-foot facility in Roxboro, NC.

We track and record product flow through the complete life-cycle. All products are tested internally during production and then by licensed third-party laboratories to ensure the quality in compliance with applicable state and federal regulations.

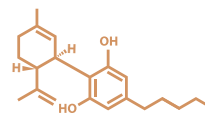

ISOLATES & RARE CANNABINOIDS

CBD ISOLATE

CBD isolate is a crystalline powder that contains 99% pure CBD. A traditional process is used to remove all the active compounds from the cannabis plant, followed by a refinement process that strips away all other phytocannabinoids, including THC, and any plant matter, leaving behind only CBD in its purest form.

- **Appearance:** White crystalline powder

- **Flavor:** No distinct flavor

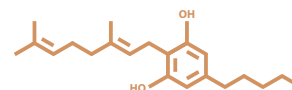

- **Odor:** No distinct odor

- **CBD Potency:** >99.5% CBD

- **Consistency:** Powder

- **Melting Point:** 66-68°C

CBG ISOLATE

CBG, or cannabigerol, is a highly refined cannabinoid derived from the hemp plant.

CBG is one of the more prominent chemical compounds in both hemp and cannabis plants and displays a binding affinity to both CB1 and CB2 receptors. Based on initial scientific literature, CBG isolate has shown digestive and antimicrobial properties and is very well suited for ingestible and topical products.

- **Potency:** >99.5%+

- **Formula:** C₂₁H₃₂O₂

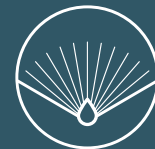

- **Molecular Weight:** 316.5 g/mol

- **Appearance:** White, pale powder

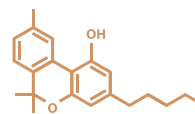

- **Odor:** Odorless

- **Flavor:** No distinct flavor

- **Melting Point:** 52°C

CBN ISOLATE

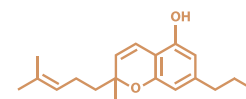

Cannabinol (CBN) is a cannabinoid isolated from the plant Cannabis. It is a metabolite of tetrahydrocannabinol (THC). Cannabinol preferentially binds to the CB2 receptor, which is mainly expressed on a variety of immune cells, such as T-cells, B-cells, macrophages and dendritic cells. Stimulation of CB2 receptors by cannabinol may both trigger apoptosis in these cells and inhibit the production of a variety of cytokines.

- **Potency:** >99.5%+
- **Formula:** C₂₁H₂₆O₂
- **Molecular Weight:** 310.43 g/mol
- **Appearance:** Pink Solid

- **Odor:** Odorless
- **Flavor:** No distinct flavor
- **Melting Point:** 77°C

CBC ISOLATE

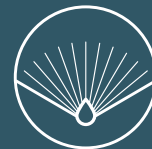

Cannabichromene (CBC) is one of four major cannabinoids in Cannabis sativa L and is the second most abundant cannabinoid in cannabis. CBC is racemic mixture. It has two stereoisomers. CBC is not active at CB1 or CB2 receptors.

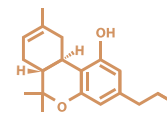

- **Potency:** >99.5%+
- **Formula:** C₂₁H₃₀O₂
- **Molecular Weight:** 314.46 g/mol
- **Appearance:** Brown Oil

- **Odor:** Smell of phenolic compounds/tarty
- **Flavor:** No distinct flavor
- **Boiling Point:** 220°C

THCV ISOLATE

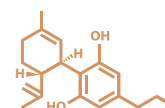

THCV, or tetrahydrocannabivarin, is one of the rare cannabinoids among over 80 cannabinoids that have been identified in the *Cannabis sativa* species, which include CBD, THC, and many other biologically active molecules. THCV is a homologue of tetrahydrocannabinol (THC) having a propyl (3-carbon) side chain instead of a pentyl (5-carbon) group on the molecule.

- **Potency:** >99.5%+
- **Formula:** C₁₉H₂₆O₂
- **Molecular Weight:** 286.41 g/mol
- **Appearance:** Pink liquid; which turns white/pale white solid upon refrigeration

- **Odor:** Odorless
- **Flavor:** No distinct flavor
- **Melting Point:** 220°C

CBDV ISOLATE

Cannabidivarin (CBDV) is a homolog of the well known cannabinoid cannabidiol (CBD). It is almost chemically identical to CBD, but with a structure that is shortened by two methylene bridges.

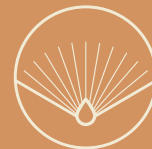

- **Potency:** >99.5%+
- **Formula:** C₁₉H₂₆O₂
- **Molecular Weight:** 286.19 g/mol
- **Appearance:** Tan Powder

- **Odor:** Odorless
- **Flavor:** No distinct flavor
- **Flash Point:** 48.2°F

DISTILLATE & SPECIALTY BLENDS

BROAD SPECTRUM DISTILLATE

90%+ potent broad spectrum oil is refined to remove cannabinoids such as THC but to retain beneficial minor cannabinoids.

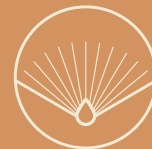

- **Appearance:** Medium to dark gold color
- **Flavor:** Natural terpenes
- **Odor:** Natural terpenes

- **CBD Potency:** 90%+ CBD, <0.0% THC
- **Consistency:** Solid at room temperature. Thick and sticky when melted.
- **Melting Point:** 55-60°C

5G DISTILLATE

5G is a Broad Spectrum Distillate composed of 5% CBG and >85% CBD. It offers a similar profile of plant compounds as our Broad Spectrum (THC-Free) Distillate.

- **Appearance:** Pale yellow solid at ambient temperature; pale yellow oil when warmed
- **Purity:** >90% TAC
- **CBD Potency:** >85%
- **CBG Potency:** 5%
- **Melting Point:** 66°C

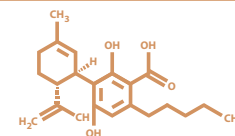

10N DISTILLATE

10N is a Broad Spectrum Distillate composed of 10% CBN and >85% CBD. It offers a similar profile of plant compounds as our Broad Spectrum (THC-Free) Distillate.

- **Appearance:** Amber oil at ambient temperature
- **Purity:** >95% TAC
- **CBD Potency:** >85%
- **CBN Potency:** 10%
- **Melting Point:** 66°C

CBDA

CBDA (Cannabidiolic Acid) is one of many compounds produced by cannabis and hemp. Abundant in the live plants of CBD varieties, it converts to the better known cannabinoid CBD (cannabidiol) over time and when exposed to heat.

Our process extracts CBDA with water, yielding a product that is as close to the plant as possible, retaining all the benefits, adding nothing of harm.

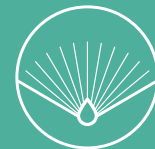

- **Potency:** 80%+
- **Formula:** C₂₂H₃₀O₄
- **Molecular Weight:** 358.5 g/mol
- **Appearance:** Brown powder

- **Odor:** Odorless
- **Flavor:** No distinct flavor
- **Melting Point:** 530°C

WATER SOLUBLE

HYDROBOND™ CBD – Liquid

HydroBond CBD™ Water Soluble Liquid is made with Open Book Extracts' premium broad spectrum CBD oil. Through an emulsion process, the oil is suspended in water allowing the CBD molecules to become nano-particularized, and then combined with other ingredients to maintain the suspension. The nano-emulsified, polymer-free liquid is formulation-ready. With a clean taste and good color, HydroBond CBD™ Water Soluble Liquid can be easily mixed into a wide range of beverages without need for flavor or color masking.

- **Appearance:** Milky, semi-translucent
- **Flavor:** Flavor Free
- **Solubility:** 100%
- **CBD Potency:** 5%
- **Consistency:** Watery

- **Prinova Nano-Emulsion System:**
Gum Acacia, Damar Gum, Citric Acid, Sunflower Lecithin, Potassium Sorbate, Sodium Benzoate, Natural Flavor

HYDROBOND™ CBD – Powder

HydroBond CBD™ Water Soluble Powder is made with Open Book Extracts' premium broad spectrum CBD oil. Through an emulsion process, the oil is suspended in water allowing the CBD molecules to become nano-particularized. Once the emulsion process is complete, the CBD is spray-dried onto a proprietary acacia fiber blend resulting in powder that is readily dispersible in liquid with no oily surfactants or bitter taste. The clean ingredients, gentle mineral water flavor, and white/clear color make the HydroBond CBD™ Water Soluble Powder an excellent formulation-ready addition to beverages and topicals alike.

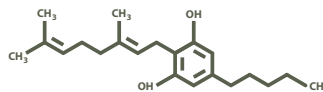

- **Appearance:** White crystalline powder
- **Flavor:** No distinct flavor
- **Solubility:** 100%

- **CBD Potency:** 20%
- **Consistency:** Powder
- **Acacia Fiber:** 80%

HYDROBOND™ CBG

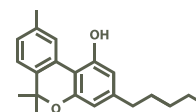

HydroBond CBG™ Water Soluble Powder is made with Open Book Extracts' premium CBG Isolate. Through an emulsion process, this specialty blend is suspended in water allowing the CBG molecules to become nano-particularized. Once the emulsion process is complete, the CBG is spray-dried onto a proprietary acacia fiber blend resulting in powder that is readily dispersible in liquid with no oily surfactants or bitter taste. The clean ingredients, gentle mineral water flavor, and white/clear color make the HydroBond™ CBG Water Soluble Powder an excellent formulation-ready addition to beverages and topicals alike.

- **Appearance:** White crystalline powder
- **Flavor:** No distinct flavor
- **Solubility:** 100%

- **CBG Potency:** 20%
- **Consistency:** Powder
- **Acacia Fiber:** 80%

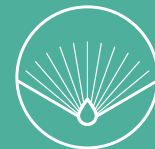

HYDROBOND™ CBN

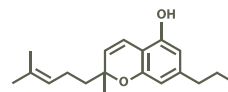

HydroBond CBN™ Water Soluble Powder is made with Open Book Extracts' premium CBN Isolate. Through an emulsion process, this specialty blend is suspended in water allowing the CBN molecules to become nano-particularized. Once the emulsion process is complete, the CBN is spray-dried onto a proprietary acacia fiber blend resulting in powder that is readily dispersible in liquid with no oily surfactants or bitter taste. The clean ingredients, gentle mineral water flavor, and white/clear color make the HydroBond™ CBN Water Soluble Powder an excellent formulation-ready addition to beverages and topicals alike.

- **Appearance:** White crystalline powder
- **Flavor:** No distinct flavor
- **Solubility:** 100%

- **CBN Potency:** 20%
- **Consistency:** Powder
- **Acacia Fiber:** 80%

HYDROBOND™ CBC

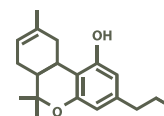

HydroBond CBC™ Water Soluble Powder is made with Open Book Extracts' premium CBC Isolate. Through an emulsion process, this specialty blend is suspended in water allowing the CBC molecules to become nano-particularized. Once the emulsion process is complete, the CBC is spray-dried onto a proprietary acacia fiber blend resulting in powder that is readily dispersible in liquid with no oily surfactants or bitter taste. The clean ingredients, gentle mineral water flavor, and white/clear color make the HydroBond™ CBC Water Soluble Powder an excellent formulation-ready addition to beverages and topicals alike.

- **Appearance:** White crystalline powder
- **Flavor:** No distinct flavor
- **Solubility:** 100%

- **CBC Potency:** 20%
- **Consistency:** Powder
- **Acacia Fiber:** 80%

HYDROBOND™ THCV

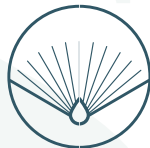

HydroBond THCV™ Water Soluble Powder is made with Open Book Extracts' premium THCV Isolate. Through an emulsion process, this specialty blend is suspended in water allowing the THCV molecules to become nano-particularized. Once the emulsion process is complete, the THCV is spray-dried onto a proprietary acacia fiber blend resulting in powder that is readily dispersible in liquid with no oily surfactants or bitter taste. The clean ingredients, gentle mineral water flavor, and white/clear color make the HydroBond THCV™ Water Soluble Powder an excellent formulation-ready addition to beverages and topicals alike.

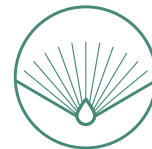

- **Appearance:** White crystalline powder
- **Flavor:** No distinct flavor
- **Solubility:** 100%

- **THCV Potency:** 20%
- **Consistency:** Powder
- **Acacia Fiber:** 80%

Open Book Collections

Open Book Extracts is excited to present beautifully crafted products that feature precise minor cannabinoid ratios. Each blend has been developed to target some of our body's most vital needs - healthy skin, mental acuity, and improved sleep.

BEAUTY FROM WITHIN

Beauty is not skin deep, but rather requires a holistic approach -- the real secret to healthy skin and a beautiful exterior comes from within.

Our Beauty From Within collection combines CBG with Collagen, to help you maintain great skin, hair, bones, and joints, giving you the glow of good health inside and out.

Hydrobond™ CBD tinctures

Finished Goods

Open Book Extracts is proud to unveil our lineup of cannabinoid-infused finished goods, ready to deliver to your customers. From formulation through packaging, our team has created a portfolio of innovative and efficacious products, crafted from the finest, high-quality OBX cannabinoid ingredients.

WHITE LABEL CBD TINCTURES

Our **T-Free Broad Spectrum** oil is a refined version of the full-spectrum extract. All of the therapeutic compounds found in the full-spectrum oil are preserved. We then remove the THC molecule completely. This extract delivers enhanced therapeutic benefits without the risk of psychoactive effects of THC.

Our **Full spectrum CBD** oil contains all the same cannabinoids and compounds found in the hemp plant. With more than 100 different cannabinoids naturally present in the hemp plant, full spectrum oil enables what is commonly referred to as the 'entourage effect', or the therapeutic impact of these cannabinoids interacting with each other. This wholesale full spectrum CBD oil also retains other beneficial aspects of the plant, such as essential vitamins, minerals, fatty acids, protein, chlorophyll, terpenes, flavonoids, and fiber.

With 300-1,500mg per one-ounce bottle, each serving delivers 10-50mg/mL of CBD derived from 100% US grown Hemp. Serving size is 1 dropper (1 mL) with 30 servings per bottle.

- **Strengths:** 10-50mg/mL | 300-1,500mg/bottle
- **Active Ingredients:** T-Free Broad Spectrum or Full Spectrum
- **Other Ingredients:** MCT Oil, Natural Flavoring, Sweetener
- **Flavors:** Strawberry, Peppermint, Apple Cinnamon, Orange, Natural
- **Flavors for Pets:** Peanut Butter
- **Formula Appearance:** Clear, very slight yellow tint
- **Formula Density** (@25C): 0.94 - 0.96 g/mL
- **Primary Packaging Dimensions:** 1.2" x 1.2" x 3.1" (w/o carton)

- **Product Net Contents:** 1froz (29.5mL)
- **Product Net Weight:** 0.99 oz
- **Product Gross Weight:** 2.75 oz
- **Master Case Dimensions:** 10.31" x 6.31" x 4.63"
- **Bottles/Case:** 40
- **Master Case Gross Weight:** 7.13 lb
- **Cases/Pallet:** Up to 252
- **Minimum Order Quantity:** 1,500 Units
- **Recommended Storage Temp:** 68-75° F (20-25° C)
- **Shelf Life:** 12 Months

WHITE LABEL CBD IMMUNITY RELEASE TABLETS

OBX is proud to partner with Volunteer Botanicals to release a proprietary Broad Spectrum Immunity Instant Release Cannabinoid Tablet, with a blend of terpenes as a “first line of defense” for immunity support.

By neutralizing and basically unlocking lipids within hemp extracts, we cause them to behave like a powder. These extracts are then locked up within a matrix of USP pharma-grade excipients that are released upon contact with acidic environments. They become available to the body within minutes. We have taken the knowledge of the pharmaceutical industry and applied them to natural extracts to create these cutting-edge tablets. We call it Cannabis 2.0.

The products are easy and enjoyable to consume, the deliveries are small and they are familiar to the consumer. Cannabinoid tablets are merging the technology and formulation of proven tableting technology and integrating pure cannabinoid extracts and sometimes additional terpenes. The technology allows us to convert both the cannabinoids and terpenes into flowable powder.

The 50mg cannabinoid tablets have breaker bars pressed into the tablet for easy splitting if the client would prefer half the dose. Some clients prefer 50mg all at once and or split the tablet for a booster throughout the day.

Custom cannabinoid tablet deliveries are the next generation of products for clients needing more than oil-based supplements. The first wave of hemp and cannabis products have been oil-based due to the ease of creation. We are moving passed this stage into a more scientific approach to cannabinoid delivery.

- **Instructions:** Take 1-2 tablets daily. Increase or decrease as needed.
- **Ingredients:** Broad Spectrum Flowable Powder, Pregelatinized Starch, Microcrystalline Cellulose, Dicalcium Phosphate, Ac-Di-Sol, Magnesium Stearate, Steric Acid, Immunity Terpene Blend (Alpha Bisabolol, Alpha Terpineol, Beta Caryophyllene, Humulene, Limonene, Linalool, Myrcene, Nerolidol, Phytol)

WHITE LABEL ORAL DISSOLVING SLEEP TABLETS

OBX is proud to partner with Volunteer Botanicals to release an Oral Dissolving Sleep Tablet.

Oral dissolving tablets (ODTs) provide an alternative to capsules. They resemble a traditional tablet, but have one important difference: they disintegrate rapidly in the mouth, and therefore do not need to be swallowed. A significant proportion of the general population finds swallowing tablets difficult, and an ODT can greatly increase compliance. No liquid is required when taking the medication either, which is a significant advantage when on the go.

The rapid onset of action is of benefit in drugs designed to treat acute conditions, such as migraines and psychiatric incidents, as well as conditions like insomnia. Furthermore, if the drug is absorbed within the oral cavity rather than being digested, it avoids the first pass of the liver. This pre-gastric absorption can reduce side effects caused by metabolites formed by liver enzymes.

Volunteer Botanicals has taken the knowledge of the pharmaceutical industry and applied them to natural extracts to create the next wave of cannabis deliveries. The oral dissolving tablets are easy and enjoyable to consume, the deliveries are small and they taste great. For companies looking to differentiate their offerings, user-friendly dosage forms could be a fertile opportunity. Many people are ready for alternatives and there are very few options outside of oil-based deliveries.

These powders literally change the way cannabinoids are delivered to the body.

- **Instructions:** Place 1-2 tablets on the tongue and allow to dissolve naturally. When using nighttime delivery, take 30 minutes before going to sleep. Increase over time if necessary, to achieve desired results.
- **Ingredients:** Cannabinol Isolate Flowable Powder, Cannabidiol Isolate Flowable Powder, Sorbitol, Mannitol, Fructose, Microcrystalline Cellulose, Crospovidone, Colloidal Silicon Dioxide, Maltodextrine, Dextrose, Natural and Artificial Flavor (Melatonin in Nighttime formula)

A note from our CEO

At Open Book Extracts, we want to remove any barriers that stand between you and our high-quality products and services.

- **Price-Match Policy:** With our high-quality ingredients and ultra-diligent customer service, we prefer to compete on dimensions other than price. We'll match the product prices of any certified cGMP processor — with an estimate, invoice, or other written proof of the quoted price from the company.
- **Money-Back Guarantee:** We are committed to providing you with top-quality products. Satisfaction with our products is guaranteed or we'll give you your money back.
- **24/7 Personal Customer Care:** We are dedicated to serving your needs. Whether you are looking to place an order, or have questions about our products or services, our team is available to you 7 days a week — please see below for their direct contact information, and feel free to reach out anytime.
