At Open Book

WE'RE PURISTS AT HEART

- **WE'RE HERE TO HELP YOU DO GREAT THINGS WITH CANNABINOIDS.**

Nature is our muse, holding the secrets to wellness and serving as the root of all of our products

- **100% PURITY IS OUR GRAIL**

From the start, OBX recruited scientists from the pharmaceutical industry and gave them the resources to develop proprietary methods of refinement that exceed industry standards. Our obsession with purity is an unremitting focus on pushing our internal capabilities and expanding our partnerships to offer more cannabinoids at 99%+ purity than anyone in the industry.

- **QUALITY ASSURANCE**

In pursuit of purity, OBX maintains the highest levels of testing. Developing systems. Training suppliers and teams. Working with your organization. Monitoring compliance. The work of quality assurance at OBX is constant, and sharing our analyses with you is our standard operating procedure.

ISOLATES & RARE CANNABINOIDS

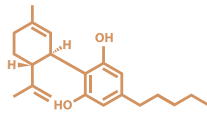

Open Book Extracts has worked extremely hard developing the highest quality and most efficacious isolate and rare cannabinoid ingredients in the industry. We are excited to unveil our extensive lineup of industry leading products.

CBD Isolate

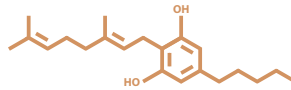

CBD isolate is a crystalline powder that contains 99% pure CBD. A traditional process is used to remove all the active compounds from the cannabis plant, followed by a refinement process that strips away all other phytocannabinoids, including THC, and any plant matter, leaving behind only CBD in its purest form.

- **Appearance:** White crystalline powder
- **Flavor:** No distinct flavor
- **Odor:** No distinct odor
- **CBD Potency:** >99.5% CBD
- **Consistency:** Powder
- **Melting Point:** 66-68°C

CBG Isolate

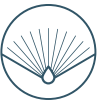

CBG, or cannabigerol, is a highly refined cannabinoid derived from the hemp plant.

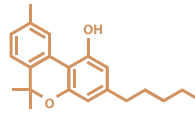

CBG is one of the more prominent chemical compounds in both hemp and cannabis plants and displays a binding affinity to both CB1 and CB2 receptors. Based on initial scientific literature, CBG isolate has shown digestive and antimicrobial properties and is very well suited for ingestible and topical products.

- **Formula:** C₂₁H₃₂O₂
- **Molecular Weight:** 316.5 g/mol
- **Appearance:** White, pale powder
- **Odor:** Odorless
- **Flavor:** No distinct flavor
- **Melting Point:** 52°C

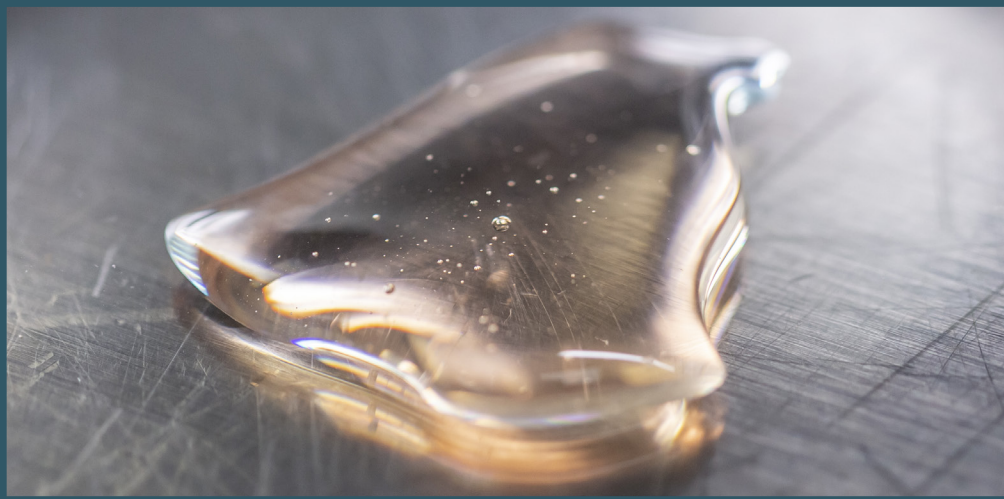

CBN Isolate – Liquid

Cannabinol (CBN) is a cannabinoid isolated from the plant Cannabis. It is a metabolite of tetrahydrocannabinol (THC). Cannabinol preferentially binds to the CB2 receptor, which is mainly expressed on a variety of immune cells, such as T-cells, B-cells, macrophages and dendritic cells. Stimulation of CB2 receptors by cannabinol may both trigger apoptosis in these cells and inhibit the production of a variety of cytokines.

- **Appearance:** Pink Solid
- **Flavor:** No distinct flavor
- **Odor:** Odorless
- **Potency:** >99.5%+
- **Formula:** C₂₁H₂₆O₂
- **Molecular Weight:** 310.43 g/mol
- **Melting Point:** 77°C

CBN Isolate – Powder

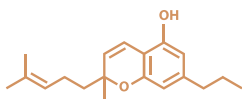

Cannabinol (CBN) is a cannabinoid isolated from the plant Cannabis. It is a metabolite of tetrahydrocannabinol (THC). Cannabinol preferentially binds to the CB2 receptor, which is mainly expressed on a variety of immune cells, such as T-cells, B-cells, macrophages and dendritic cells. Stimulation of CB2 receptors by cannabinol may both trigger apoptosis in these cells and inhibit the production of a variety of cytokines.

- **Appearance:** Pink powder
- **Flavor:** No distinct flavor
- **Odor:** Odorless
- **Potency:** >99.5%+
- **Formula:** C₂₁H₂₆O₂
- **Molecular Weight:** 310.43 g/mol
- **Melting Point:** 77°C

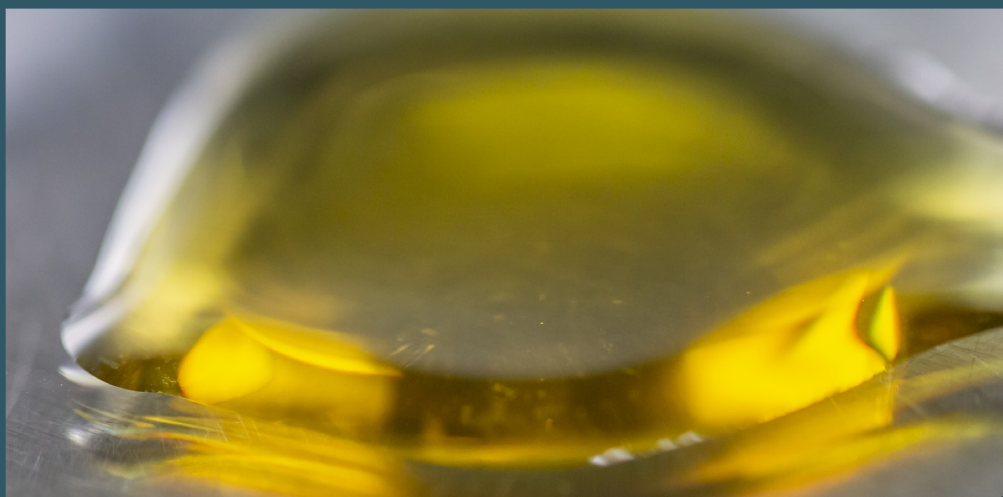

CBC Isolate

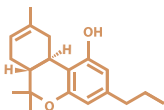

Cannabichromene (CBC) is one of four major cannabinoids in *Cannabis sativa* L and is the second most abundant cannabinoid in cannabis. CBC is racemic mixture. It has two stereoisomers. CBC is not active at CB1 or CB2 receptors.

- **Appearance:** Soft Brown Oil
- **Flavor:** No distinct flavor
- **Odor:** Phenolic compounds/tarty
- **Potency:** >99.5%+
- **Formula:** C₂₁H₃₀O₂
- **Molecular Weight:** 314.46 g/mol
- **Melting Point:** 220°C

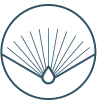

THCV Isolate

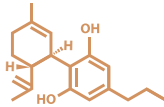

THCV, or tetrahydrocannabivarin, is one of the rare cannabinoids among over 80 cannabinoids that have been identified in the *Cannabis sativa* species, which include CBD, THC, and many other biologically active molecules. THCV is a homologue of tetrahydrocannabinol (THC) having a propyl (3-carbon) side chain instead of a pentyl (5-carbon) group on the molecule.

- **Appearance:** Pink liquid; turns white/pale white solid upon refrigeration
- **Flavor:** No distinct flavor
- **Odor:** Odorless
- **Potency:** >99.5%+
- **Formula:** C₁₉H₂₆O₂
- **Molecular Weight:** 286.41 g/mol
- **Melting Point:** 220°C

CBDV Isolate

Cannabidivarin (CBDV) is a homolog of the well known cannabinoid cannabidiol (CBD). It is almost chemically identical to CBD, but with a structure that is shortened by two methylene bridges.

- **Potency:** >99.5%+
- **Formula:** C₁₉H₂₆O₂
- **Molecular Weight:** 286.19 g/mol
- **Appearance:** Tan Powder
- **Odor:** Odorless
- **Flavor:** No distinct flavor
- **Flash Point:** 48.2°F

DISTILLATE & SPECIALTY BLENDS

Open Book Extracts has worked extremely hard developing the highest quality and most efficacious distillate & specialty blend ingredients in the industry. We are excited to unveil our extensive lineup of industry leading products.

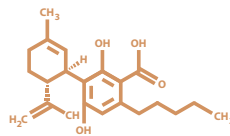

Broad Spectrum Distillate

90%+ potent broad spectrum oil is refined to remove cannabinoids such as THC but to retain beneficial minor cannabinoids.

- **Appearance:** Medium to dark gold
- **Flavor:** Natural terpenes
- **Odor:** Natural terpenes
- **CBD Potency:** 99%+ CBD, <0.0% THC
- **Consistency:** Solid at room temperature. Thick & sticky when melted.
- **Melting Point:** 55-60°C

CBDA Distillate

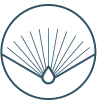

CBDA (Cannabidiolic Acid) is one of many compounds produced by cannabis and hemp. Abundant in the live plants of CBD varieties, it converts to the better known cannabinoid CBD (cannabidiol) over time and when exposed to heat.

Our process extracts CBDA with water, yielding a product that is as close to the plant as possible, retaining all the benefits, adding nothing of harm.

- **Appearance:** Brown powder
- **Flavor:** No distinct flavor
- **Odor:** No distinct odor
- **Potency:** 80%+
- **Formula:** C₂₂H₃₀O₄
- **Melting Point:** 530°C

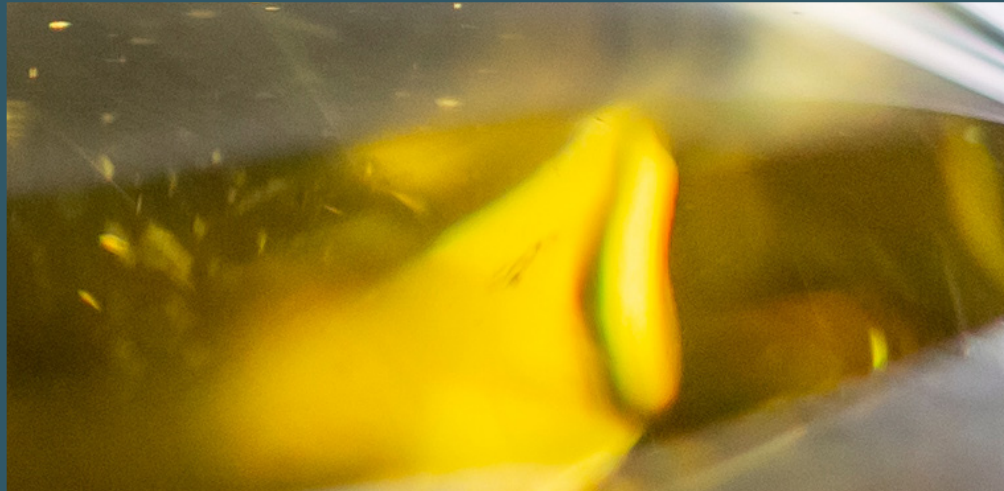

5G Distillate

5G is a Broad Spectrum Distillate composed of 5% CBG and >85% CBD. It offers a similar profile of plant compounds as our Broad Spectrum (THC-Free) Distillate.

- **Appearance:** Pale yellow solid at ambient temperature; pale yellow oil when warmed
- **Purity:** >90% TAC
- **CBD Potency:** >85%
- **CBG Potency:** 5%
- **Melting Point:** 66°C

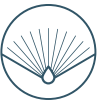

10N Distillate

10N is a Broad Spectrum Distillate composed of 10% CBN and >85% CBD. It offers a similar profile of plant compounds as our Broad Spectrum (THC-Free) Distillate.

- **Appearance:** Amber oil at ambient temperature
- **Purity:** >95% TAC
- **CBD Potency:** >85%
- **CBN Potency:** 10%
- **Melting Point:** 66°C

THC-Free Broad Spectrum Distillate

85%+ potent broad spectrum oil is refined to remove cannabinoids such as THC but to retain beneficial minor cannabinoids and terpenes. This distillate offers 0.0% THC or less and 1% - 5% minor cannabinoid profile.

- **Appearance:** Medium to dark gold
- **Flavor:** Natural terpenes
- **Odor:** Natural terpenes
- **CBD Potency:** 85%+ CBD, <0.0% THC, minors 1% - 3%
- **Consistency:** Solid at room temperature. Thick & stick when melted.
- **Melting Point:** 55-60°C

Full Spectrum Distillate

85%+ potent full spectrum oil contains all the cannabinoids and compounds found in the hemp plant with 0.3% THC or less and 1% - 5% minor cannabinoid profile.

- **Appearance:** Medium to dark gold
- **Flavor:** Natural terpenes
- **Odor:** Natural terpenes
- **Potency:** 85%+ CBD, <0.0% THC, minors 1% - 3%
- **Consistency:** Solid at room temperature. Thick and sticky when melted.
- **Melting Point:** 55-60°C

HYDROBOND™ WATER SOLUBLE

Open Book Extracts has partnered with Prinova to develop a line of water soluble CBD products. Each the products allow for customization and are completely flavor free. Just pour them into a glass of water, give a quick shake or stir and enjoy!

HydroBond™ CBD – Liquid

HydroBond CBD™ Water Soluble Liquid is made with Open Book Extracts' premium broad spectrum CBD oil. Through an emulsion process, the oil is suspended in water allowing the CBD molecules to become nano-particularized, and then combined with other ingredients to maintain the suspension. The nano-emulsified, polymer-free liquid is formulation-ready. With a clean taste and good color, HydroBond CBD™ Water Soluble Liquid can be easily mixed into a wide range of beverages without need for flavor or color masking.

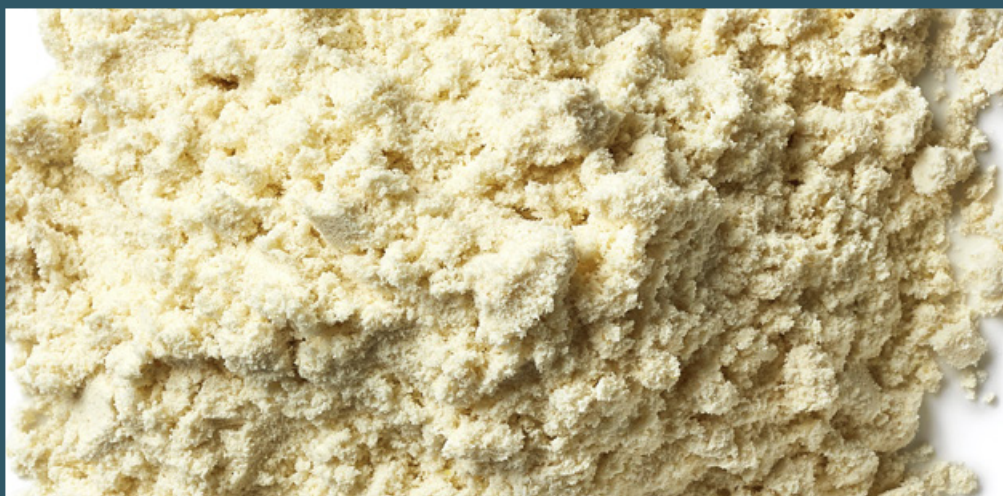

- **Appearance:** Milky, semi-translucent
- **Flavor:** Flavor Free
- **Solubility:** 100%
- **CBD Potency:** 5%
- **Consistency:** Watery
- **Prinova Nano-Emulsion System:**
Gum Acacia, Damar Gum, Citric Acid,
Sunflower Lecithin, Potassium Sorbate,
Sodium Benzoate, Natural Flavor

HydroBond™ CBD – Powder

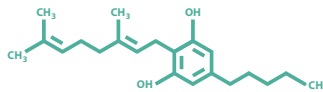

HydroBond CBD™ Water Soluble Powder is made with Open Book Extracts' premium broad spectrum CBD oil. Through an emulsion process, the oil is suspended in water allowing the CBD molecules to become nano-particularized. Once the emulsion process is complete, the CBD is spray-dried onto a proprietary acacia fiber blend resulting in powder that is readily dispersible in liquid with no oily surfactants or bitter taste. The clean ingredients, gentle mineral water flavor, and white/clear color make the HydroBond CBD™ Water Soluble Powder an excellent formulation-ready addition to beverages and topicals alike.

FINISHED GOODS

- Ingestibles -

Open Book Extracts is proud to unveil our lineup of cannabinoid-infused finished goods, ready to deliver to your customers. From formulation through packaging, our team has created a portfolio of innovative and efficacious products, crafted from the finest, high-quality OBX cannabinoid ingredients.

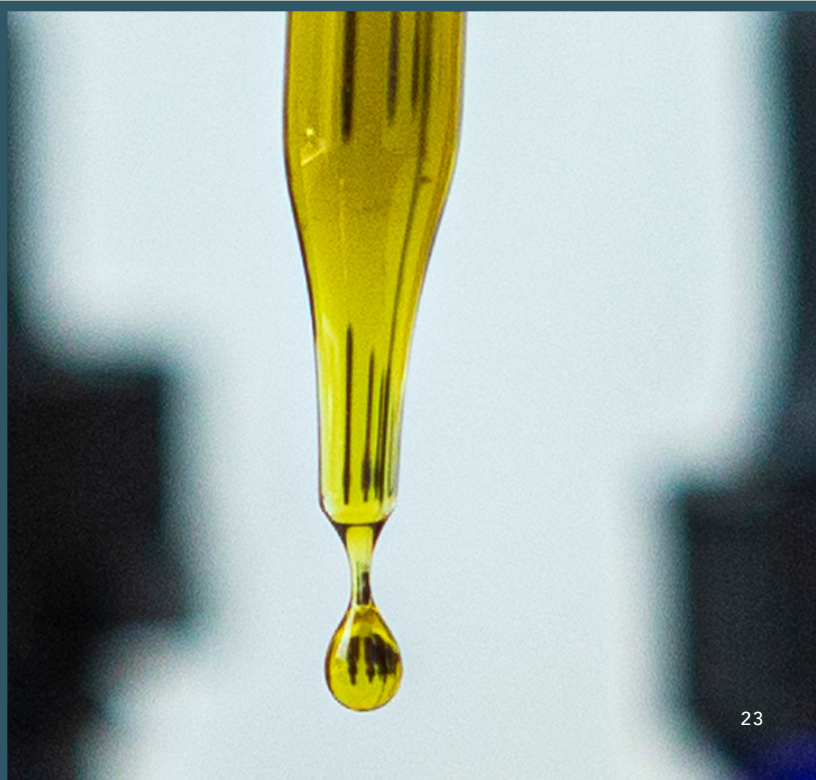

Custom CBD Tinctures

Our **T-Free Broad Spectrum** oil is a refined version of the full-spectrum extract. All of the therapeutic compounds found in the full-spectrum oil are preserved. We then remove the THC molecule completely. This extract delivers enhanced therapeutic benefits without the risk of psychoactive effects of THC.

Our **Full spectrum CBD** oil contains all the same cannabinoids and compounds found in the hemp plant. With more than 100 different cannabinoids naturally present in the hemp plant, full spectrum oil enables what is commonly referred to as the 'entourage effect', or the therapeutic impact of these cannabinoids interacting with each other. This wholesale full spectrum CBD oil also retains other beneficial aspects of the plant, such as essential vitamins, minerals, fatty acids, protein, chlorophyll, terpenes, flavonoids, and fiber.

Our tinctures can be customized for effect and flavor - reach out to your sales rep to discuss options to ensure we create a product that meets your specific needs.

FINISHED GOODS

- Dissolvables -

Open Book Extracts has partnered with Volunteer Botanicals to create a line of dissolvable products that offer a unique and efficacious way to enjoy the benefits of CBD. We are excited to work with you to bring these incredible products to market.

Custom CBD Immunity Release Tablets

OBX is proud to partner with Volunteer Botanicals to release a proprietary Broad Spectrum Immunity Instant Release Cannabinoid Tablet, with a blend of terpenes as a “first line of defense” for immunity support.

By neutralizing and basically unlocking lipids within hemp extracts, we cause them to behave like a powder. These extracts are then locked up within a matrix of USP pharma-grade excipients that are released upon contact with acidic environments. They become available to the body within minutes. We have taken the knowledge of the pharmaceutical industry and applied them to natural extracts to create these cutting-edge tablets. We call it Cannabis 2.0.

The products are easy and enjoyable to consume, the deliveries are small and they are familiar to the consumer. Cannabinoid tablets are merging the technology and formulation of proven tableting technology and integrating pure cannabinoid extracts and sometimes additional terpenes. The technology allows us to convert both the cannabinoids and terpenes into flowable powder.

- **Strength:** 50mg per tablet
- **Active Ingredients:** THC-Free Broad Spectrum Flowable Powder
- **Lavendar Other Ingredients:** Pregelatinized Starch, Microcrystalline Cellulose, Dicalcium Phosphate, Ac-Di-Sol, Magnesium Stearate, Steric Acid, Immunity Terpene Blend (Alpha Bisabolol, Alpha Terpineol, Beta Caryophyllene, Humulene, Limonene, Linalool, Myrcene, Nerolidol, Phytol)

CBD Dissolving Sleep Tablets

OBX is proud to partner with Volunteer Botanicals to release an Oral Dissolving Sleep Tablet.

Oral dissolving tablets (ODTs) provide an alternative to capsules. They resemble a traditional tablet, but have one important difference: they disintegrate rapidly in the mouth, and therefore do not need to be swallowed.

A significant proportion of the general population finds swallowing tablets difficult, and an ODT can greatly increase compliance. No liquid is required when taking the medication either, which is a significant advantage when on the go.

The rapid onset of action is of benefit in drugs designed to treat acute conditions, such as migraines and psychiatric incidents, as well as conditions like insomnia. Furthermore, if the drug is absorbed within the oral cavity rather than being digested, it avoids the first pass of the liver. This pre-gastric absorption can reduce side effects caused by metabolites formed by liver enzymes.

- **Strengths:** 5mg per tablet
- **Active Ingredients:** CBD Isolate Flowable Powder
- **Lavendar Other Ingredients:** Sorbitol, Mannitol, Fructose, Microcrystalline Cellulose, Crospovidone, Colloidal Silicon Dioxide, Maltodextrine, Dextrose, Natural and Artificial Flavor (Melatonin in Nighttime formula)
